

# Technical Data Sheet

## Hardtop Optima

### Product description

This is a two component chemically curing polysiloxane resin based coating. The product does not contain isocyanates. It has a high gloss finish with excellent gloss retention. It is a high solids product. The product is fully recoatable at any stage of curing. The product has good application properties with low dry spray. To be used as topcoat in atmospheric environments.

### Typical use

Marine:

Recommended for topside, deck and superstructure.

Protective:

Recommended for offshore environments, refineries, power plants, bridges and buildings. Used as a topcoat in pre-qualified NORSOK systems.

### Approvals and certificates

Low flame spread certificate according to IMO FTPC part 2 MSC61 (67)  
NORSOK System 1, Rev.5

Additional certificates and approvals may be available on request.

### Other variants available

Hardtop Optima Alu

Refer to separate TDS for each variant.

### Colours

according to colour card and Multicolor Industry tinting system (MCI)

### Product data

| Property              | Test/Standard             | Description      |
|-----------------------|---------------------------|------------------|
| Solids by volume      | ISO 3233                  | 76 ± 2 %         |
| Gloss level (GU 60 °) | ISO 2813                  | high gloss (85+) |
| Flash point           | ISO 3679 Method 1         | 30 °C            |
| Density               | calculated                | 1,35 kg/l        |
| VOC-US/Hong Kong      | US EPA method 24 (tested) | 215 g/l          |

The provided data is typical for factory produced products, subject to slight variation depending on colour.

All data is valid for mixed paint.

Gloss description: According to Jotun Performance Coatings' definition.

## Technical Data Sheet

### Hardtop Optima

## Film thickness per coat

### Typical recommended specification range

|                            |            |                   |
|----------------------------|------------|-------------------|
| Dry film thickness         | 60 - 100   | µm                |
| Wet film thickness         | 80 - 130   | µm                |
| Theoretical spreading rate | 12,7 - 7,6 | m <sup>2</sup> /l |

Bright colours may need film thickness in the high end of the recommended specification range to achieve opacity.

## Surface preparation

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

### Surface preparation summary table

| Substrate       | Surface preparation                                           |                                                               |
|-----------------|---------------------------------------------------------------|---------------------------------------------------------------|
|                 | Minimum                                                       | Recommended                                                   |
| Coated surfaces | Clean, dry and undamaged compatible coating (ISO 12944-5 6.1) | Clean, dry and undamaged compatible coating (ISO 12944-5 6.1) |

## Application

### Application methods

The product can be applied by

|         |                                                                                                                 |
|---------|-----------------------------------------------------------------------------------------------------------------|
| Spray:  | Use airless spray or conventional spray.                                                                        |
| Brush:  | Recommended for stripe coating and small areas. Care must be taken to achieve the specified dry film thickness. |
| Roller: | Recommended for stripe coating and small areas. Care must be taken to achieve the specified dry film thickness. |

### Product mixing ratio (by volume)

|                       |           |
|-----------------------|-----------|
| Hardtop Optima Comp A | 4 part(s) |
| Hardtop Optima Comp B | 1 part(s) |

## Technical Data Sheet

### Hardtop Optima

#### Thinner/Cleaning solvent

Thinner: Jotun Thinner No. 7 / Jotun Thinner No. 17

#### Guiding data for airless spray

Nozzle tip (inch/1000): 13-19  
 Pressure at nozzle (minimum): 150 bar/2100 psi

#### Guiding data for air spray

Nozzle tip (inch/1000): 11-19 (HVLP) / 1.1-1.9 mm (pressure pot)  
 Pressure at nozzle (minimum): 2.1 bar/30 psi (HVLP) / 2.1 bar/30 psi (pressure pot)

## Drying and Curing time

| Substrate temperature     | 0 °C | 5 °C | 10 °C | 23 °C | 40 °C |
|---------------------------|------|------|-------|-------|-------|
| Surface (touch) dry       | 20 h | 10 h | 5 h   | 3 h   | 2 h   |
| Walk-on-dry               | 48 h | 12 h | 7 h   | 4 h   | 3 h   |
| Dry to over coat, minimum | 32 h | 12 h | 7 h   | 4 h   | 3 h   |
| Dried/cured for service   | 20 d | 15 d | 10 d  | 5 d   | 3 d   |

Drying and curing times are determined under controlled temperatures and relative humidity below 85 %, and at average of the DFT range for the product.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.

Walk-on-dry: Minimum time before the coating can tolerate normal foot traffic without permanent marks, imprints or other physical damage.

Dry to over coat, minimum: The shortest time allowed before the next coat can be applied.

Dried/cured for service: Minimum time before the coating can be permanently exposed to the intended environment/medium.

## Induction time and Pot life

| Paint temperature | 23 °C |
|-------------------|-------|
| Pot life          | 6 h   |

## Technical Data Sheet

### Hardtop Optima

## Heat resistance

|                  | Temperature |        |
|------------------|-------------|--------|
|                  | Continuous  | Peak   |
| Dry, atmospheric | 120 °C      | 140 °C |

Peak temperature duration max. 1 hour.

The temperatures listed relate to retention of protective properties. Aesthetic properties may suffer at these temperatures.

## Product compatibility

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat: epoxy, zinc epoxy, epoxy mastic  
Subsequent coat: polysiloxane

## Packaging (typical)

|                       | Volume<br>(litres) | Size of containers<br>(litres) |
|-----------------------|--------------------|--------------------------------|
| Hardtop Optima Comp A | 4/16               | 5/20                           |
| Hardtop Optima Comp B | 1/4                | 1/5                            |

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

## Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

### Shelf life at 23 °C

|                       |             |
|-----------------------|-------------|
| Hardtop Optima Comp A | 48 month(s) |
| Hardtop Optima Comp B | 24 month(s) |

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

## Technical Data Sheet

### Hardtop Optima

## Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

## Health and safety

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

## Colour variation

When applicable, products primarily meant for use as primers or antifoulings may have slight colour variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.
